

Who should you trust with treatments like Botox and Dermal Filler?

In our opinion; a Board Certified Plastic Surgeon

There has been a lot of controversy raised in the media surrounding who should perform injectable treatments such as Botox and Dermal Filler. The market is inundated with salons, spas and medical spas performing injectable services. Our advice: be prudent and remember that injectables are considered a medical procedure.

Knowing who is performing your injectable services is extremely important and an integral part in achieving the results you want. We believe that experience is key and the best advice is to defer to an experienced and board certified plastic surgeon.

Dr. M. W. Elmaraghy, M.D., F.R.C.S. (C) performs all injectable services at Rejuvenate Medical Spa and SpaSurgica. Dr. M. W. Elmaraghy's eye for detail and meticulous nature will set him aside from others. Dr. M. Elmaraghy attended medical school at the University of Toronto and was the recipient of a number of awards including an award for excellence in the field of surgery and was selected to be a member of the prestigious Alpha Omega Alpha Honour Medical Society. Dr. Elmaraghy completed a five-year residency in Plastic and Reconstructive Surgery at the University of Western Ontario. He is currently a certified Fellow of the Royal College of Physicians and Surgeons of Canada, with a specialist certificate in Plastic Surgery. Dr. M. W. Elmaraghy is a Board Certified Plastic Surgeon who knows the complex surgical anatomy of your face and is a professional you can trust with your cosmetic services.

We encourage you to seek out the cost factor as well; we are competitive with Medical Spas in the area so why not go to the most highly trained Physician and Surgeon that objectively has the highest level of education achieved in aesthetic medicine.

Important things to ask:

- Does the facility offer more than just Botox, Filler (i.e. skin care products, chemical peels and/or lasers) and cosmetic surgery?
- Are cosmetic treatments an active and frequent part of the practice?
- Are these services an adjunct to other medical services?
- Is it an active and frequent part of the practice. They don't just "do it on the side".
